

## DAY 6

### DEPLOYMENT:

#### 1. Set Up a Vercel Account

- If you don't have a Vercel account, create one by going to [Vercel](#) and signing up with GitHub, GitLab, or Bitbucket.

#### 2. Prepare Your Project for Deployment

Make sure your project is ready to deploy:

- Your project should be working locally.
- You should have your code committed to a Git repository (on GitHub, GitLab, or Bitbucket).

#### 3. Deploy and then you're ready to go

### REASON FOR SHORT:

I HAVE A HIGH FEVER
